GELBVIEWH/BALANCER Production Sale

Thursday

March 10th, 2011

12:30 p.m. MST

**Burlington Livestock Exchange
Burlington, Colorado**

Welcome to our 2011 Sale

We would like to take this opportunity to welcome all of you to our annual production sale. Also, a special thanks to those of you who have purchased bulls in the past and have confidence in our program.

Most of the bulls again this year are Balancers. This is due to the fact that this is what our customers prefer, according to past sales. The Meat Animal Research Center (MARC) proclaims that crossbred females are 30% more productive over their lifetimes. The advantages of crossbreeding effect cow efficiency, longevity, lifetime productive, weaning performance and yearling performance. Remember, Balancer is a trademark name that the Gelbvieh breed has given to the Gelbvieh-Angus cross in which both parents are registered in their respective breed associations. If one parent wasn't registered, the offspring could not have a meaningful set of EPDs and other valuable information.

In order to keep improving and stacking the genetics in our favor we have bulls in this sale out of two new herdsires (EGL U409 who is sired by SAV Net Worth 4200 and EGL U709 who is sired by EGL Northern Wind P068 ET). And we also have a few bulls sired by two popular AI Sires in SAV Net Worth 4200 and TC Total 410.

It's an exciting time in the cattle business with unprecedented prices and experts tell us that it should hold for some time. The nation's cowherd is still shrinking and when cow numbers do start increasing and more heifers are retained for breeding, slaughter numbers will drop even further and prices will increase even more.

There are bulls in this sale that offer calving ease as well as performance. We look forward to seeing you on sale day to evaluate this year's set of bulls.

We have moved our sale location to Burlington, Colorado because of the closure of our local sale barn. Burlington is a full service community along I-70 that has most major motel chains.

If you are interested in a bull, let us know and we can help you with the purchase or put you in touch with someone that will help bid on the bull for you. Please do not hesitate to call or stop by if you have questions on any of the offering.

Sincerely,
The Railes

There will be a \$50/bull discount for taking them home sale day.

Raile Gelbvieh/Balancer Production Sale
Thursday March 10th 2011 12:30 p.m. MST
Burlington Livestock Exchange
Burlington, Colorado

Sale Day Phone: 719-346-8900

Auctioneer: Tracy Harl, 2420 N. 2nd Avenue, Hastings, NE 402-461-3575

Selling 47 Lots

100% Black -- Several Homozygous Black -- Some Homozygous Polled

1 Purebred Yearling Gelbvieh (Lot 1)

41 Yearling Balancers (Lots 2-42)

5 Fall Balancers (Lot 43-47)

First Season Breeding Guarantee: Buyers of all bulls selling for \$2,000 or more injured the first breeding season will have credit at the next sale at the value of the purchase price minus salvage value. Contact Raile Gelbvieh promptly so the decision to return the bull to Raile Gelbvieh or sold by buyer may be made. First breeding season ends September 1st of the year of the purchase. Death loss is the buyer's risk as one can purchase mortality insurance.

Trucking: Free trucking on bulls of \$2,000 or more within a 250 mile radius. Otherwise to a central location. If bulls are taken home sale day there is a \$50 per head discount.

Viewing: Bulls may be viewed at home or online at www.railegelbvieh.com

Igenity DNA Tested: All bulls have had a DNA profile test for the carcass traits, coat color and BVD-PI negative and some for the homozygous polled trait.

Herd Health: All bulls have had shots, been poured and will have passed a semen test by sale day. Necessary health papers will be supplied with each sale animal. Registration papers will be transferred.

All announcements from block take precedence over all written material.

Accommodations: Burlington is served by most major motel chains

- He was the Reserve Division II winner in the Purebred show in Denver. The judge said that there were lots of things he liked about this bull. It was a very tough division since the Champion in his division went on to win overall Grand Champion Gelbvieh Bull and was Purebred Futurity Champion the day before.
- We purchased this guy while he was on his mother last spring not realizing how he was really going to turn out. His dam is a moderate easy keeping female.
- Yield Grade score of 7

We purchased Legend from Lee Cattle Company as primarily a heifer bull and he has definitely filled that goal, but along with that he is an easy fleshing individual packed with lots of meat and seems to pass it on to his offspring. He is a moderate framed bull that phenotypically looks just like his sire OCC Legend 616L with a big hip and lots of volume.

104	-2.4	54	121	27

A very docile attractive sire that sires those calves that flat out put on the pounds. He had some of the highest weaning weight bulls in this year's sale. He adds pounds to both the WW & YW EPDs along with tremendous Milk. He is also known for his marbling capabilities as he had an IMF scanning ratio of 199 as a yearling.

One of our new Balancer Herdsires who is sired by EGL Northern Wind P068 ET and a TC Freedom 104 dam. He has a well rounded set of EPDs for calving ease growth and milk.

**RHRG MS LEGEND 946W**

Ms Legend 946W has 8 half brothers in the sale offering.

She was well liked in Denver as a calf and

had a great show career as a bred heifer:

Grand Champion Balancer Female at the Iowa State Fair and class winner at the NAILE in Louisville, American Royal in Kansas City, and NWSS in Denver (junior and open show).

The IGENITY Profile

IGENITY® provides the beef industry with the most comprehensive genetic profile of multiple traits of economic importance. The insights gained from an IGENITY profile help producers make more confident selection, management and marketing decisions. The IGENITY profile includes multiple-marker analyses for traits such as: Tenderness, Marbling, Quality Grade, Yield Grade, Fat Thickness, Ribeye Area, Average Daily Gain, Heifer Pregnancy Rate, Stayability, Calving Ease and Docility.

IGENITY Profile traits reported:

Raile Gelbvieh is providing IGENITY scores for several of the traits. The remaining trait scores are available upon request for your consideration. Please contact us or our IGENITY Representative Rick Pfortmiller (785) 230-9507 and we will be happy to share those with you.

Profile Score Advantages

To assist cattle producers in understanding the value of DNA technology, IGENITY has developed a scoring system for each trait using a scale of 1 to 10. Higher values are not necessarily better — they simply indicate that the animal has the potential for more of that trait. The following descriptions and table (Table 1) are useful in describing each trait and reflect the relative difference expected in animals compared to contemporaries with an IGENITY profile score of 1.

Average Daily Gain:

The IGENITY profile results for Average Daily Gain identifies an animal’s genetic potential for rate of gain. Animals which score a 10 would have the potential to gain .81 pounds more per day than animals that score a 1.

Tenderness:

The analysis in the IGENITY profile for tenderness represents an animal’s genetic potential for tenderness as measured by Warner-Bratzler Shear Force (WBSF), with 10 being the most tender and 1 being the least tender. Lower shear force means more tender beef. In a group of animals with a score from IGENITY of 10 for tenderness, 2.3 pounds less shear force is required than an animal with a score from IGENITY of 1.

Marbling Score:

Higher scores from IGENITY for marbling equal greater genetic potential for marbling. In a group of animals with a score from IGENITY of 10 for marbling, the average marbling score can be expected to be 161 points greater than animals with a score of 1. The USDA beef grading system for marbling uses a 100 to 999 point scale. Marbling points reflect how much intramuscular fat is present in each carcass, and thus the potential to grade USDA Choice.

Fat Thickness:

Lower IGENITY profile scores indicate less external fat, while higher scores reflect more external fat with a difference of .37 inches between a group of animals that scored a 1 versus a group of animals that scored a 10.

Ribeye Area:

Higher scores from the IGENITY profile reflect larger ribeye areas and lower scores reflect smaller ribeye areas. In a group of animals with a score from IGENITY of 10 for ribeye area, the average ribeye is expected to be 2.56 square inches larger than in a group of animals with a score of 1.

Percent Choice (Quality Grade)

Higher scores from IGENITY for quality grade equal greater genetic potential to grade choice or higher. In a group of animals that possess a score from IGENITY of 10 for quality grade, it is likely that 64.4% or more should grade USDA Choice or higher.

Table 1. IGENITY RESULTS KEY

Trait	IGENITY Result	1	2	3	4	5	6	7	8	9	10
	Average Daily Gain	0	0.05	0.14	0.24	0.34	0.44	0.54	0.64	0.72	0.81
Tenderness in lbs. of WBSF	0	-0.2	-0.4	-0.8	-1.1	-1.2	-1.5	-1.9	-2.0	-2.3	
USDA Marbling Score	0	17.7	35.5	53.3	70.6	88.4	106.4	123.6	141.3	161.4	
Backfat Thickness	0	.06	.09	.13	.17	.21	.24	.28	.32	.37	
Ribeye Area in Sq. Inches	0	0.24	0.53	0.80	1.07	1.35	1.64	1.93	2.22	2.56	
Percent Choice	0	7.2	14.3	21.5	28.6	35.8	42.9	50.1	57.2	64.4	
Yield Grade	0	0.15	0.31	0.46	0.61	0.76	0.92	1.07	1.21	1.35	

NR (No Results)

Some samples may look normal when we submitted them, but still are unable to produce acceptable results. This often occurs due to contaminants that are undetectable to the naked eye; i.e. dirt, mold or other foreign matter. In many instances, a new sample has been submitted and results will be available shortly.

How to use the IGENITY Profile

IGENITY Scores are easy to incorporate into your selection criteria. They represent an additional tool when combined with EPD’s, ultrasound and visual appraisal. As the case with any selection method, single trait selection should be avoided. Select those animals that best combine the traits you desire to emphasis in your herd. As an example, if you are trying to decide between two bulls – Bull A and Bull B - and Bull A has an IGENITY profile score for Marbling of 8 and Bull B has a Marbling score of 7 and you prefer Bull B’s EPD’s and phenotype; then you can confidently select Bull B as his genetic potential is still in the direction you prefer.
